The **phonics assessment** and **phonics teaching** sheets are suitable for use with infants and adults.

Suggestions for use: For school purposes - you will need two copies of the phonics assessment sheet per student and one copy of the phonics teaching sheet. In school use the same copy of the phonics assessment sheet periodically (e.g. half-termly or termly) as a record of the student's progress. Mark with a small tick (colour-code with the date) if student knows the letter/s-sound correspondence to automaticity. Word examples with the sounds required are on the phonics teaching sheet. Send the second copy of the phonics assessment sheet along with the teaching sheet 'home' to help with small-steps learning. At home use the two sheets alongside one another and then the phonics assessment sheet is used (daily) to keep checking the learning.
